AKSHAY KUMAR

IT SUPPORT ANALYST | APPLICATION SUPPORT | PRODUCTION SUPPORT

Kerala, India | 8289826962 | akshaykumarvakayar@gmail.com

PROFESSIONAL SUMMARY

IT Support and Application Support professional with nearly 4 years of experience in software implementation, application support, production troubleshooting, backend data analysis, client issue resolution, and technical coordination. Experienced in supporting enterprise business and healthcare applications including PMS, EMR, HRMS, ERP, POS, inventory, billing, accounts, front office, restaurant, clinic, and pharmacy modules. Hands-on experience with MySQL database analysis, SQL queries, data validation and corrections, application configuration, deployments, server troubleshooting, IIS, AWS environments, testing, user training, onboarding, and onsite and remote support. Experienced in investigating application and transaction issues by analysing frontend behaviour, backend data, configuration, logs, and database records. Strong ability to coordinate with development, implementation, and client teams to resolve production issues and maintain application availability.

CORE SKILLS

Application Support | Technical Support | Production Support | Software Implementation | Application Installation & Configuration | Incident Troubleshooting | Issue Analysis & Resolution | MySQL | SQL Queries | Backend Data Analysis | Database Validation & Data Correction | ERP/POS Support | PMS/EMR/HRMS Support | Client Coordination | Requirement Gathering | User Training & Onboarding | Manual Testing | Deployment Support | IIS | AWS | Application Configuration | Production Issue Management | Remote & Onsite Support | Technical Documentation | Microsoft Excel & Word

PROFESSIONAL EXPERIENCE

TOUCHQ SOFTWARE SOLUTIONS PVT. LTD., KOCHI, KERALA

Senior Support & Implementation Engineer

19 Jan 2026 – 02 Jun 2026

• Led application support and implementation activities across client locations and coordinated day-to-day technical support operations.
• Managed implementation activities including application installation, configuration, deployment, workflow setup, testing, user onboarding, and post-implementation support.
• Supported and coordinated junior support engineers and trainees, providing technical guidance and application training.
• Handled client requirements, production issues, application troubleshooting, data-related issues, and implementation-related activities.
• Provided training to new employees and trainees on application workflows, troubleshooting procedures, and support processes.
• Supported enterprise business and healthcare applications including PMS, EMR, inventory, accounts, front office, restaurant, billing, clinic, pharmacy, and other operational modules.
• Investigated application issues by checking frontend behaviour, backend database records, configurations, logs, and transaction data.
• Performed MySQL-based data analysis and corrections for transaction, accounting, patient, inventory, and application-related issues.
• Coordinated with development teams for application defects, enhancement requirements, and issues requiring code-level investigation.
• Conducted testing before production updates and supported application/build deployments for client environments.
• Provided remote and onsite technical support and coordinated with clients until issue resolution and closure.

Support Engineer

19 Jan 2024 – 18 Jan 2026

• Provided application and technical support for enterprise business and healthcare applications used by multiple client organizations.
• Supported PMS, EMR, inventory, billing, accounts, front office, restaurant, clinic, pharmacy, laboratory, store, nursing, and cash collection modules.
• Troubleshot application issues by reproducing problems, checking application behaviour, analysing database records, and validating configurations.
• Used MySQL to investigate transaction issues, perform data validation, identify incorrect records, and execute authorized data corrections.
• Analysed failed, pending, duplicate, or incorrectly recorded transactions and coordinated with development teams when the issue was application-related.
• Investigated discrepancies between live transactions and reports after application updates or installations by checking code behaviour, input data, database records, and configuration.
• Supported application installation, configuration, upgrades, deployments, and production updates in client environments.
• Worked with IIS and AWS-based environments for application deployment, configuration, and troubleshooting.
• Investigated server and application connectivity issues including service availability, port-related issues, application access problems, and database connection issues.
• Performed manual testing before application updates and validated important workflows after deployment.
• Provided remote and onsite support, user assistance, technical guidance, and application training to clients.
• Coordinated with internal development and implementation teams to resolve complex technical and application issues.

Junior Support Engineer

19 Jan 2023 – 18 Jan 2024

• Provided application support for business and healthcare software applications and assisted clients with technical and functional issues.
• Supported application installation, configuration, user setup, troubleshooting, and routine maintenance activities.
• Assisted in troubleshooting PMS, EMR, inventory, billing, accounts, front office, restaurant, clinic, and other application modules.
• Used MySQL to check backend records and identify data-related issues affecting application transactions and reports.
• Performed authorized database corrections and validation based on issue requirements and internal procedures.
• Investigated transaction failures and mismatches by checking application screens, database records, and relevant configuration settings.
• Assisted senior support engineers with client implementations, application upgrades, testing, and deployment activities.
• Conducted user support and basic application training for clients and assisted users in understanding application workflows.
• Handled remote support requests and coordinated with technical teams for issues requiring further investigation.
• Maintained communication with clients during troubleshooting and provided updates until resolution.

Trainee – Technical Support

19 Jul 2022 – 18 Jan 2023

• Assisted the technical support team in providing application support and troubleshooting for business and healthcare software applications.
• Learned application workflows, database structures, support procedures, installation processes, and client support practices.
• Assisted with application installation, configuration, testing, and basic troubleshooting activities.
• Supported users with application-related queries and assisted in identifying issues through frontend checks and backend database validation.
• Used MySQL for basic data analysis and verification under supervision.
• Assisted with client onboarding, application demonstrations, user training, and post-implementation support.
• Supported senior team members during onsite and remote troubleshooting activities.

KEY TECHNICAL EXPERIENCE

Application Support: Enterprise application support, production troubleshooting, incident investigation, application configuration, issue reproduction, defect identification, user support, and resolution coordination.
Database & SQL: MySQL, SQL queries, data validation, data comparison, data correction, transaction analysis, ledger/accounting data checks, duplicate record investigation, import validation, and backend troubleshooting.
Implementation: Application installation, configuration, deployment, upgrades, client onboarding, workflow configuration, testing, user training, documentation, and post-implementation support.
Infrastructure & Deployment: IIS, AWS environments, application/server configuration, service and connectivity troubleshooting, deployment support, and production environment checks.
Business Applications: PMS, EMR, ERP, POS, HRMS, inventory, billing, accounts, front office, restaurant, clinic, pharmacy, laboratory, store, nursing, and cash collection modules.
Testing & Troubleshooting: Manual testing, regression validation, transaction verification, frontend/backend analysis, configuration checks, issue reproduction, production troubleshooting, and coordination with development teams.

TOOLS & TECHNOLOGIES

MySQL | SQL | Microsoft Excel | Microsoft Word | IIS | AWS | Tally Prime | ERP/POS Applications | PMS/EMR Applications | HRMS Applications | Python | Power BI

EDUCATION

B.Tech – Computer Science and Engineering
CGPA: 7.52
Diploma – Computer Technology
CGPA: 7.28
Higher Secondary – 72%
SSLC – 70%
